I very much enjoyed chilling out and spending a few hours playing this game. It is beautifully rendered and is a great distraction after a busy day. The puzzles were not difficult but enough to present some sort of challenge (though I confess I played on the easiest level!). I can recommend it.. Horrible multi-circle puzzle that is impossible to complete without a guide.. It's ok, but not for full price! Way too short (2h) and easy, no new puzzles. Videoscenes lag.. Very cleverly done, with a delightful plot; would like to see more of this "dawn of the industrial age" theme; eagerly awaiting the next in this series.. Loved "Modern Tales: Age of Invention" and I say it's worth the price!

Orchid Games and Artifex Mundi, please make another one. :)

PLUS

- + incredibly vibrant graphics (absolutely loved the colourful "steampunk" art)
- + interactive and interesting characters (chatting with them throughout game)
- + voice acting and music are top notch (music adjusted from happy to somber at right moments)
- + leans more to adventure with good balance of puzzles and hidden object scenes
- + story kept me involved and intrigued all the way to the end (with teaser to sequel)
- + neat mixture of science, engineering and history (sneaking in education)
- + length of game hit the sweet spot for me 4-5 hours with rewarding ending
- + 30 collectible atoms with "bonus" extras

CONS

- there were some audio/video sync issues (not always just big action scenes)
- some dialogue was a bit over the top but I found it more silly than negative

Pretty good game. It's fun and helps pass the time. I enjoyed the beautiful graphics.. One of the better HOG games published by Artifex. A nice story with a little bit of steampunk theme. The puzzles are the well known variants of the Artifex games, so this might be a let down for people who expect something different. Fortunately the hidden object parts are relative good integrated in the story.

The graphics vary. While the scenery is very nice, the animation and the people is simplistic. Voice acting is a bit on the weak side and stilted mainly because the dialogs are not written that well.

Not much of side achievements; just find the atomic symbols in the scenery.

Recommended, especially if you can get it at a discount. It just lacks that little extra bit of polish which would have made it great.. The game was fine...until the end, when it hung on me at the final (or possibly penultimate) scene. It was frustrating to make it that far and be unable to finish. I am running Linux Mint 17.2. YMMV on other operating systems.. nicet game but not one of your greatest

cool plot vand I like Albert[real genius Einstein]

its hard to solve the hidden object and there are no alternatives like mahjongs to solve instead of. Very entertaining, pretty art & good story, As always, from Artifex Mundi.

Do i need to say more?. nicet game but not one of your greatest

cool plot vand I like Albert[real genius Einstein]

its hard to solve the hidden object and there are no alternatives like mahjongs to solve instead of. Ok. I really liked this one. Good Hog. Good story. Um there's a few places where you have to go back and forth to get things done. Its makes sense after you've done them, but it can be a bit odd doing them. I really liked the story. Kind of an odd collection of characters in this one. All Historical I think. You'll see. What other HOG do you get to meet Coco Chanel? Highly recomend. Especially if it's on sale.

Comrades!

Some time ago we showed you [how Irony Curtain looked in the early prototype phase and how it looks like now](#).

Today we'd like to talk a little bit more about the reasons behind the change and the whole creative process. It's no doubt that Irony Curtain came a long way from the times when it was just a prototype called simply 'Matryoshka'.

There are three main reasons why we've decided to simplify the art style:

1. The previous style looked great but it didn't play well . Meet Artifex Mundi at Gamescom & PAX West 2018!:

Do you want to meet the creators of your favorite games in person? Then you should definitely visit us during Gamescom in Cologne & PAX West 2018!

You will have one of a kind opportunity to play our two latest projects ahead of release:

[My Brother Rabbit](#) (release: Fall 2018) is a beautifully drawn exploration adventure and puzzle game set in a surreal world that mixes reality with a child's imagination. It is scheduled to release this Fall.

[Irony Curtain: From Matryoshka with Love](#) (release: 2019) is a satirical point-and-click adventure that takes you out of your bourgeoisie comfort zone and throws you right in the middle of a Cold War class struggle to the death – or until you surrender your toilet paper.

We'll be a part of big Polish Booth on both events - and we will have lots of surprises for you!

If you want to know more about both events, please visit [Gamescom website](http://www.gamescom.global)[www.gamescom.global] and [PAX West website](http://prime.paxsite.com) [prime.paxsite.com]
