First off, the actual "port" Steam gives you is horrible. I would never, ever buy this at full price (this game's a steal during sales anyway).

This makes the process of playing all the levels without loading up a WAD each time much, MUCH easier (just make the WAD and run a port through ZDL as the other DOOM games):

If you don't know what the hell "run a port through ZDL" means, here (I keep spamming this around, but only because it's so simple and effective):

This may seem like a lot of work but in my opinion it's worth putting in these few minutes (and it really shouldn't take more than 10mins tops if you're slow) to get a really good experience.

Now then, I didn't really get into Ultimate DOOM because everyone and their Minecraft-playing 8-year-old brother knows about it, but this might be something that people aren't that familiar with.

These levels were mostly unreleased DOOM II maps, and they were meant to be played one by one (although there are maps that you can group together according to who made them). For the most part, I think they warrant the name "Master Levels" because they feature either very challenging shooting, intricate puzzles or even both. The majority are really good and some are just cheap (lots of Revenant spamming or similar), but I'd say the amount of good maps outweighs the bad ones by quite a wide margin.

As someone who played DOOM back in the day, but lived in a craphole country where getting DOOM alone was a challenge, yet alone an official map pack, this was a nice breath of fresh air. If you're an old DOOM fan tired of ploughing through Ultimate DOOM for the n-th time, I'd definitely recommend this. If you're a new DOOM player and you liked the crazier moments of Ultimate DOOM (looking at you, Thy Flesh Consumed) or DOOM II, well, there's lots of that and more, so also a "recommend" from me.. Good old wonky pinball. Best \$2.00 on a game with there was more to do but what can you expect for the price? A absolute masterpiece of course its well made and extremely fun to try and beat a friends time now play on and don't touch that spaghetti.. That 6 car was dope or more. A great visual novel that deals with depression. There are some NSFW scenes, but they do add to the plot. Well worth the price.

Just a fantastic game! I'm delighted with the illustrations of the girls and the gameplay. Thank you very much to the developer for such a great opportunity to spend time with pleasure. Highly recommend!. It is, probably, the lowest scored game I have ever played. No brain killings, dozen of bugs, poor AI, poor weapons, bad voice acting and A LOT of things "stolen" from Gears of War.

After reading multiple reviews I had thought this is the waste of my money but since there was not so many co-op games I decided to get it.

After few playthroughs I can sadly say that all prejudices were true: few clip offs the map, AI is "stupid like Nazis in WW2 movies", and voices just horrible. All seems like uglier brother of GoW.

BUT there is something in this game which gets you in. Something which makes you play it over again. Ugly duckling for sure but with good partner and some patience it may become a swan.

Steampunk setting gets into you somehow. Wild west style of cogs, blimps and steam bikes makes experience unique. If you add to shootings some acrobatics in Lara Croft style, you have mix which is not as bad as some write about.

I can forgive this game all the bad because I can have GoW + Tomb Raider + Steampunk.

And I will repeat myself again: steam bikes are just cool.. This game is bad, bad, bad but well... i kinda liked it. The bugs where all over the shot but more funny than game breaking like mobs spinning in a circle getting stuck in walls and having to jump like a loon to get out of the wall. The voice acting is amazing----lybad its funny!

But the game is fun easy to play and for a couple of ££ i would suggest getting it.

Dont expect a A grade game . do expect steam powered bikes which do f\*\*ck all hard to ride and have zero impact on plot other than a filler. but they look fantastic!

. If this game tried one, rather than all, of its weird tricks, it would probably be better, and if it had an instructions screen that just laid text out rather than making you sit through a long scrolling, warped line of text like a demented cracktro\* to learn what in the everloving hell is going on.

Also I think it's glitchy, because it won't let me buy anything from the "store" despite having more than enough currency. And I have no idea what in the hell determines your stage ranking when you're done. If it's time\number of moves like I suspect, then to hell with this game, because it's still got RNG-based drops, and that means HELLO REPLAYS FOR LUCKY CHAINS.

Game's bad is what I'm saying.

\* Google it, younguns. Horrible game. Absolutely sexist - you cannot even chose the gender of the mine cart. The grammar is horrible (e.g. "didn't tried"). The game makes fun of my most favourite movie series TWILIGHT. The explosions come nowhere close to Michael Bay. I only wanted to hurt myself using my mouse 5 times.. Poor downgrade from AWE1
